Description

The AE46D/CC is a plug and play Multi-Function Clock/Timer, specially configured for stand-alone applications. No wiring is required. Built-in controls and a plug-in power module provide quick and easy set up. It can be used as a portable device, or it can be permanently installed using the wall mount bracket provided.

AE Series Multi-Function Clock/Timers operates simultaneously as a time of day clock, a count up elapsed timer, and a count down elapsed timer. A built-in switch on the top panels allows the operator to select the desired function as it is in progress without affecting the other functions.

Specifications

Digits:	Six, 4-Inch high super bright red LED. Seven segment diffused character.	Time:	Displays time in 12 or 24 Hour format. Hours, Minutes, and Seconds.
Enclosure:	Black Anodized Aluminum. Wall mount bracket included. (24"W x 6.1"H x 3.5"D) For indoor use only.	Elapsed Time:	Displays elapsed time in Hours, Minutes, and Seconds.
Power:	120 VAC/12 VAC 60Hz. (12 Watts max.) Power module included. Plugs into standard 120 Volt AC outlet		Counts up elapsed time to a preset value and holds at the preset (Max preset 30:59:59). Without a preset, it counts up to 99:59:59 and rolls over to 00:00:00 continuing to count.
Backup:	Built-in rechargeable battery backup. Keeps time and counts up to 12 hours without power.		Counts down elapsed time from a preset value (Max preset 30:59:59). Counts down to 00:00:00 and holds.
Controls:	Built-in controls for setting 12/24 Hr format, time of day, and presets for elapsed timers. Also controls Start/Sop and Reset functions for elapsed timers.		The built-in Reset push-button resets the elapsed timer to start a new count.
Accuracy:	Line synchronous for best long term accuracy. 0.003% crystal during power fail backup.		
Operating Temperature	0 to 50 degrees C
