

ALPHA-NUMERIC DISPLAYS

DM3X SERIES

MODULAR ALPHA-NUMERIC DISPLAY SYSTEMS

Three-Inch High, 5 x 7 dot matrix characters with Super Bright Red LED's.

Attractive black anodized aluminum enclosures.

Each character has its own built-in controller with ASCII character decoder.

Modular design allows for any configuration from 1 to 250 characters.

Use with your PC - Software is provided.

Or use a custom AE21 Desk-Top Terminal with your specific functions built-in.

The DM3X Series Display Modules are designed to provide special, alpha-numeric displays with as few as one character, or up to 250 characters. Each character is individually addressed by the control program or dedicated controller.

For example, up to 50, five-character displays in 50 different locations, each with its own message, can be connected to a single controller or computer.
