DESCRIPTION

AE Series Multi-Function Clock / Timers function as 12 or 24 hour stand-alone or secondary clocks, and simultaneously as presettable up or down counting elapsed timers. All clock and timer functions are programmed and controlled from built-in control switches. Optional remote switch panels are available for control up to 30 feet away.

The Master/Driver option can be installed which allows the Clock / Timer to serve as a master for AE Series remote displays. Other options are available.

Complete systems are available to cover any size facility. Options are available to reference your time of day to your computer, to NIST or to the GPS system.

Contact the factory for more details.

OTHER AE SERIES BROCHURES PROVIDE DETAILS ON OPTIONS and SIZE and TYPES of ENCLOSURES.
