PRODUCTION MONITORS   AE44-503J

Monitor Production "GOAL" and "ACTUAL" Performance

**Four-Inch High LED Digits . .
Red for Goal, Green for Actual
Visible up to 150 feet**

**Built-In Controls
for Stand-Alone Operation**

**Production GOAL automatically
advances at a programable pace**

**Computer Interface for
Data Acquisition and Control**

The AE44-503J provides: a programmable pace that automatically paces the "GOAL" display, a "COUNT" input that increments the count by one each time the input is activated, a "RUN/HOLD" switch to hold the pace during breaks or down periods, and separate "RESET" buttons for both the "GOAL" and "ACTUAL" displays.   Painted Steel Enclosure (24"W x 18"H x 4"D).

Add the Optional 2121B-P Remote COUNT Switch

The AE44-503J has an Opto-Isolated "COUNT" Input that can be connected to a variety of push-buttons, limit switches, or control equipment.

For Computer Control and Data Acquisition.

Using your computer, set the display parameters, and collect Goal, Count, and Run Time data from up to 32 AE44-503J Production Monitors.   Requires <u>AEQuery Software</u> and one 9200-0509, RS232 to RS485 Adapter per system.
