## CUSTOM DISPLAYS

### Let ATS customize a display to fit your application!

ATS understands that creative systems integrators, and contractors are often confronted with projects that require a unique solution.

Digit sizes range from .56 Inches to 12 Inches high and are available in Red, Green, and Yellow on most models.

ATS products are designed using modular sub-assemblies, "state-of-the-art" microprocessor based controllers, and labeled to fit your application. Therefore, custom displays move quickly, and cost effectively from concept to finished product.

Modular design - allows you to create nearly any desired configuration. Combine counters, timers, clocks, process indicators, and serial data inputs.
